PROFESSIONAL SUMMARY

Full Stack Python Developer with hands-on experience in building responsive web and mobile applications using Python, Django REST Framework, React.js, React Native, Next.js, and Tailwind CSS. Experienced in developing REST APIs, integrating frontend and backend systems, and working with MySQL, PostgreSQL (Supabase), and MongoDB. Completed a 4-month Full Stack Developer Internship at Solinix Tech, contributing to real-time client projects in Agile development environments. Passionate about building scalable, user-focused software solutions.

TECHNICAL SKILLS

Programming Languages: Python | JavaScript
Frontend: React.js | React Native | HTML5 | CSS3 | Tailwind CSS
Backend: Django | Django REST Framework | REST APIs
Databases: MySQL | MongoDB
Tools & Platforms: Git | GitHub | Postman | VS Code | Netlify | Supa base

INTERNSHIP EXPERIENCE

Solinix Tech | Full Stack Developer Intern **March 2026 – July 2026**

Tech Stack: React.js | React Native | JavaScript | Tailwind CSS | REST APIs | Git | GitHub

- Contributed to the development of the Stayzy property management platform using React.js and React Native.
- Developed responsive web and mobile user interfaces using React.js, React Native, and Tailwind CSS.
- Integrated frontend applications with backend REST APIs to enable seamless data communication and efficient data retrieval.
- Developed reusable UI components and resolved application bugs to improve application performance and user experience.
- Collaborated with cross-functional teams using Git and GitHub in an Agile development environment.
- Participated in testing, debugging, and feature implementation to deliver high-quality software solutions.

PROJECTS

PGMove – PG Accommodation Booking Platform (Real-Time Client Project)

Live Demo

Tech Stack: Next.js | React.js | TypeScript | Supabase (PostgreSQL) | Tailwind CSS

Developed a full-stack PG accommodation booking platform that enables users to search properties, submit enquiries, and allows administrators to manage properties and customer leads through a secure admin dashboard.

- Developed a responsive full-stack web application using **Next.js**, **React.js**, and **TypeScript**.
- Integrated **Supabase (PostgreSQL)** for property management, lead capture, and secure database operations.
- Built an **Admin Dashboard** with property CRUD operations, lead management, and authentication.
- Implemented dynamic property search, filtering, and responsive user interfaces using **Tailwind CSS**.
- Deployed the application and optimized it for responsive performance across desktop, tablet, and mobile devices.

Stayzy – Property Management Platform (Real-Time Client Project)

Tech Stack: React Native | JavaScript | Tailwind CSS | REST APIs | Git | GitHub

Developed a cross-platform property management application for managing tenants, rent collection, maintenance requests, and property operations.

- Developed responsive and reusable UI components using **React Native** and **React.js**.
- Integrated frontend screens with backend **REST APIs** for seamless data communication.
- Resolved application bugs and optimized performance to improve user experience.
- Collaborated with cross-functional teams using **Git** and **GitHub** in an Agile environment.
- Participated in testing, debugging, and feature implementation.

BrainSpark – AI Content Generation Platform
GitHub | Live Demo
Tech Stack: React.js | Django REST Framework | Python | MySQL | Tailwind CSS
Developed a full-stack AI-powered web application that generates dynamic content based on user input using a responsive interface and REST APIs.

- Developed responsive user interfaces using **React.js** and **Tailwind CSS**.
- Integrated frontend with **Django REST Framework** APIs for seamless data exchange.
- Implemented dynamic content generation based on user input.
- Managed backend data using **MySQL** and performed API testing and debugging.
- Improved application performance through testing and bug fixing.

Social Media Addiction Data Analysis
GitHub
Tech Stack: MySQL | Power BI
Analyzed social media usage data to identify trends affecting students' academic performance and lifestyle.

- Analyzed data from **705+ students** using **MySQL**.
- Created interactive dashboards using **Power BI** for data visualization.
- Identified trends related to screen time, sleep patterns, and academic performance.
- Generated actionable insights through data analysis and reporting.

EDUCATION

B.Tech – Mechanical Engineering **2021 – 2025**
Anil Neerukonda Institute of Technology and Sciences
CGPA: 8.95/10

CERTIFICATIONS

- Full Stack Python Development Training – Naresh i Technologies
- Basics of Python – Infosys Springboard
- Entrepreneurship – IIT Madras (NPTEL)
- CATIA V5 – Infosys Springboard
- Fundamentals of Automotive Systems – IIT Madras (NPTEL)
- LIDAR Data Processing – IIRS ISRO

CODING PROFILES

LeetCode | HackerRank | CodeChef
