PROFESSIONAL SUMMARY

Full-Stack Python Developer with hands-on experience in building responsive web applications and REST APIs using React.js and Django. Passionate about developing scalable applications with strong problem-solving and debugging skills.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript

Frontend: React.js, HTML5, CSS3, Tailwind CSS

Backend: Django, REST APIs

Databases: MySQL, MongoDB

Tools & Platforms: Git, GitHub, Netlify, Postman

PROFESSIONAL TRAINING

Completed 6-month Full Stack Python Development Training at Naresh i Technologies

PROJECTS

BrainSpark – AI Content Generation Platform

GitHub | Live Demo

- Developed a full-stack AI-powered web application using React.js (frontend) and Django REST API (backend).
- Implemented dynamic content generation based on user input using Python logic and API handling.
- Integrated frontend and backend using RESTful services ensuring seamless data exchange.
- Designed responsive UI using Tailwind CSS and deployed the application successfully.
- Strengthened skills in state management, debugging, and production-level deployment.

Tech Stack: React.js, Django, REST API

GUI Scientific Calculator

GitHub

- Built a desktop calculator using Python and Tkinter supporting basic and scientific operations.
- Implemented trigonometric functions, square root, percentage, and safe expression evaluation.
- Designed an intuitive GUI with error handling and modular code using OOPS principles.

Tech Stack: Python, Tkinter

Social Media Addiction Data Analysis

GitHub

- Analysed data of 705 students using MySQL queries and Power BI dashboards.
- Visualized patterns related to sleep, academic performance, and usage behaviour.
- Identified correlations between excessive social media usage and academic impact.

Tech Stack: MySQL, Power BI

Y-Shape Diffuser Performance Analysis (CFD Simulation)

- Conducted CFD simulations to study the effect of inlet velocity, turning angle, and area ratio.
- Analysed simulation data and optimized design parameters using problem-solving and analytical skills.
- Used Fusion 360, ANSYS, and AutoCAD for modelling, simulation, and visualization of fluid flow.

INTERNSHIP

Solnix Tech | Full Stack Developer Intern

May 2026 – Present

- Developing responsive web applications using React.js.
- Developing cross-platform mobile applications using React Native.
- Building backend services and REST APIs using Node.js.
- Working on frontend-backend integration and debugging real-time applications.

BHEL – Bharat Heavy Electricals Limited (06/2024 – 07/2024)

- Gained exposure to industrial manufacturing processes and CNC operations.
- Developed analytical and problem-solving skills in real-time production environments.

EDUCATION

B.Tech – Mechanical Engineering

Anil Neerukonda Institute of Technology and Sciences (2021 – 2025)

CGPA:8.95

CERTIFICATIONS

- Basics of Python – Infosys Springboard
- Entrepreneurship – IIT Madras (NPTEL)
- CATIA V5 – Infosys Springboard
- Fundamentals of Automotive Systems – IIT Madras (NPTEL)
- LIDAR Data Processing – IIRS ISRO
